

Position: React Native Mobile Developer

Location: Remote (Poland)

Role: Software Engineer

Experience Level: 3-5 years

Department: Engineering

Overview:

Join us in a dynamic role where your innovative ideas and creativity will play a pivotal part in shaping user experiences. You will be contributing to a globally recognized brand that touches the lives of millions daily. This is your chance to make an impact—are you ready to step up?

Key Qualifications:

- Minimum of 3 years' experience in mobile application development
 - Proficiency in React Native for cross-platform app development
 - Strong knowledge of Android development, leveraging Java and Kotlin for building robust mobile applications
 - Familiarity with JavaScript for enhancing app functionality and responsiveness
 - Understanding of mobile development best practices and build tools
 - Proficient in English (at least B2 level)
-

Core Responsibilities:

- Collaborate with a team to develop high-quality solutions focused on enhancing user experience for both Android and iOS platforms
- Play a key role in creating multimedia client applications using React Native
- Work closely with Engineering leads, Product teams, and Server teams to design and build multimedia applications, emphasizing rapid prototyping
- Maintain a strong focus on code quality and drive improvements in our codebase through ongoing refactoring efforts
